

Image Spot™ IP65 Lens Cover

Installation Instructions

MATERIALS NEEDED:

1. Rosco Image Spot Lens Cover Kit (Part No. 296000010052)
2. Image Spot Lens: Narrow, Medium or Wide Angle
3. Non-coated latex or lint-free fabric gloves

INSTALLATION STEPS:

1. Remove Lens Tube from Image Spot Projector or original packaging.
2. Clean all dirt, particulate and grease from front cavity.
3. Holding Lens Tube with front cavity upright, insert O-ring and Glass Cover into threaded section. (See Figure 1)
4. Place Retaining Ring on top of Glass Cover and engage threads until Retaining Ring contacts Glass Cover. (See Figure 2)
5. Hand tighten Retaining Ring approximately $\frac{1}{4}$ to $\frac{1}{2}$ turn. You will feel O-ring start to compress once contact with Glass Cover has been made. No tools are necessary to tighten the Retaining Ring.
6. Ensure the two O-rings are in place on back end of Lens Tube. Insert Lens Tube into Image Spot Projector, adjust focus as required.
